AI Risk for Boards & Executives

Fiduciary Oversight, Accountability, and Liability

Format	Duration	Audience	Deployment	LMS / SSO	PO
Live / Recorded	60-90 min	Board / C-Suite	Enterprise licensing	N/A	Supported

Executive Overview

AI Risk for Boards & Executives is a live or recorded executive briefing that gives directors and senior leaders a practical view of their oversight responsibilities when AI is used in the enterprise. It focuses on fiduciary duty, accountability, regulatory expectations, and the questions boards should ask without taking over day-to-day implementation.

Briefing Outcome

Help board members and executives understand where AI creates material risk, how oversight differs from management, and what evidence supports informed, defensible governance.

Why This Matters

AI adoption can create legal, operational, reputational, and compliance exposure faster than traditional governance processes can detect. Boards and executives need a clear oversight model so they can ask the right questions, document informed review, and direct management attention to material risks.

Enterprise Risk Exposure Addressed

- Board oversight that does not keep pace with enterprise AI adoption
- Confusion between governance oversight and technical implementation ownership
- Material AI risks that are not elevated to executive or board attention
- Weak evidence that leadership was informed, engaged, and responsive

What the Organization Receives

- **Board-Level AI Risk Briefing:** Plain-language discussion of fiduciary oversight, accountability, liability, and governance expectations.
- **Oversight Question Set:** Practical questions directors and executives can use to evaluate AI risk without managing implementation.
- **Material Risk Framing Guide:** Guidance for identifying AI risks that require executive or board-level attention.
- **Governance Evidence Notes:** Documentation language to support meeting records, committee discussion, and oversight review.
- **Leadership Action Checklist:** A practical checklist for clarifying ownership, escalation, reporting cadence, and next steps.
